

## 1. POSITION: REFRIGERATION MECHANIC

### JOB OVERVIEW

We are seeking a qualified and reliable **Refrigeration Mechanic** to join our maintenance team. The successful candidate will be responsible for delivering high-quality scheduled maintenance, servicing, and breakdown support across our commercial refrigeration systems that services 4 x supermarkets, 3 x manufacturing factories, 1 x holding freezer facility and 50+ refrigerated containers. This role requires strong technical capability and the ability to plan, coordinate, and complete work efficiently and professionally.

### KEY RESPONSIBILITIES

- Carry out **scheduled maintenance, repairs, and servicing** of commercial refrigeration systems to a high standard.
- Respond to breakdowns promptly and effectively to minimise equipment downtime.
- Diagnose faults and ensure safe, compliant rectification work.
- Coordinate and plan daily and weekly job schedules, ensuring maintenance plans and priorities are met.
- Work collaboratively with store management, contractors, and other trades to support smooth operations.
- Maintain accurate documentation, service records, and job completion reports.
- Ensure all work is carried out in line with relevant safety, regulatory, and operational standards.
- Provide professional technical advice and recommendations for system improvements and preventative solutions.

### SKILLS & EXPERIENCE

- Trade qualification in Refrigeration & Air Conditioning (essential).
- Proven experience in commercial or industrial refrigeration maintenance and repair.
- Strong diagnostic and troubleshooting skills.
- Ability to plan, organise, and prioritise workloads in a high-volume environment.
- Strong communication skills and ability to work independently or within a team.
- Valid driver's licence and relevant certifications.
